

Bespoke and standard foam fittings

For your high value products you may be considering using bespoke foam fittings to secure your goods in transit. Our experience means that we can recommend the best customised casing solution for any client.

We can advise and design effective solutions which will minimise your costs whilst ensuring the safe transport or storage of your merchandise.

We work to get an exact understanding of what it is you require and can visit you if necessary in order to recommend a cost effective solution.

In more detail

- Using CAD design (Computer Aided Design) we can produce precision drafting based on your specifications and generate interactive 3D files to help you visualize the design from all angles
- We can produce physical samples subject to required order quantities
- Test Valley Packaging can produce and deliver your custom foam inserts as well as offering a stock holding service subject to contract if required

Please contact us for a quotation or advice.

Standard foam fittings

Test Valley Packaging supply a standard range of Polyethylene foam profiles in a range of shapes and sizes. These foam profiles are excellent for protecting your product from repeated impact and heavy loads.
