

Bespoke carton step by step guide

- 1 We create a cutter guide which is a line version of your carton as a template to put your design on.

- 2 We add the branding and content, which is then sent across to the client for approval and once they are happy the design is signed off for production.

- 3 Once the artwork has been signed off the design is turned into a physical stereo allowing the bespoke carton to go into production ready for delivery.

All orders are subject to minimum order quantities
