Solvent

Acrylic

## Quick unwind

An excellent tape for use on quick production lines thanks to the consistent easy unwind coating. This type of tape performs especially well on automated packing lines such as tape machinery.

## Adheres Quickly

Produced with a very strong synthetic rubber/resin adhesive, which generates an almost instant, permanent bond and superior holding power to corrugated surfaces.

## Strong Bond

An aggressive bond once applied, it would take an extreme amount of force to cause the adhesive to pull away from itself.
