

# Acrylic tape attributes wheel

Click below to view either: Solvent or Hotmelt tape attributes

## Eco-friendly

As a water based product Acrylic tape is classified as a more friendly product in regards to not releasing hazardous vapours into the atmosphere as part of the production process.

## Cost effective

Due to a lack of VOC's in the production process of Acrylic tape there is no need for an expensive system to collect the potentially environmentally hazardous waste. This saves the (you) end user money.

## UV resistance

Acrylic tape will not breakdown when exposed to UV light, chemicals or oxidation. This means that the tape will not turn clear or yellow.
